Windows Server

Após a instalação, efetue o login no Windows Server

The screenshot shows the 'Settings' window for Windows Server. The title bar is dark blue with the word 'Settings' in white. Below the title, there is a instruction: 'Type a password for the built-in administrator account that you can use to sign in to this computer.' There are three input fields: 'User name' with 'Administrator' entered, 'Password' (empty), and 'Reenter password' (empty). A mouse cursor is pointing at the 'Reenter password' field. At the bottom right, there is a 'Finish' button and language options 'ENG' and 'PTB2'.

Settings

Type a password for the built-in administrator account that you can use to sign in to this computer.

Windows Server

The screenshot shows the 'Active Directory Domain Services Configuration Wizard' window. The title bar includes standard Windows window controls. The main area is titled 'Deployment Configuration'. On the left, a sidebar lists the wizard's steps: 'Deployment Configuration' (highlighted in blue), 'Domain Controller Options', 'Additional Options', 'Paths', 'Review Options', 'Prerequisites Check', 'Installation', and 'Results'. The main content area is divided into sections. The first section, 'Select the deployment operation', contains three radio buttons: 'Add a domain controller to an existing domain' (selected), 'Add a new domain to an existing forest', and 'Add a new forest' (highlighted with a red oval). The second section, 'Specify the domain information for this operation', includes a 'Domain:' label, an empty text box with a red asterisk, and a 'Select...' button. The third section, 'Supply the credentials to perform this operation', shows '<No credentials provided>' and a 'Change...' button. At the bottom, there are four buttons: '< Previous', 'Next >', 'Install', and 'Cancel'. A link 'More about deployment configurations' is located at the bottom left of the main content area. The top right corner displays 'TARGET SERVER SSIA5'.

Windows Server

The screenshot shows the 'Active Directory Domain Services Configuration Wizard' window. The title bar includes the Windows logo and standard window controls. The main title is 'Active Directory Domain Services Configuration Wizard'. The current step is 'Deployment Configuration', which is highlighted in the left-hand navigation pane. Other steps listed include 'Domain Controller Options', 'Additional Options', 'Paths', 'Review Options', 'Prerequisites Check', 'Installation', and 'Results'. The 'TARGET SERVER' is identified as 'SSIA5'. The main content area prompts the user to 'Select the deployment operation' with three radio button options: 'Add a domain controller to an existing domain', 'Add a new domain to an existing forest', and 'Add a new forest' (which is selected). Below this, it asks to 'Specify the domain information for this operation' with a text box for 'Root domain name:' containing the value 'teste.local'. At the bottom, there are four buttons: '< Previous', 'Next >' (which is circled in red), 'Install', and 'Cancel'. A link 'More about deployment configurations' is also present.

Windows Server

The screenshot shows the 'Active Directory Domain Services Configuration Wizard' window. The title bar includes the Windows logo and standard window controls. The main window has a blue header with the title. On the left is a navigation pane with the following items: 'Deployment Configuration', 'Domain Controller Options', 'DNS Options', 'Additional Options', 'Paths', 'Review Options' (highlighted in blue), 'Prerequisites Check', 'Installation', and 'Results'. The main area is titled 'Review Options' and shows a summary of the configuration. At the top right of the main area, it says 'TARGET SERVER SSIA5'. The summary text reads: 'Review your selections: Configure this server as the first Active Directory domain controller in a new forest. The new domain name is "teste.local". This is also the name of the new forest. The NetBIOS name of the domain: TESTE Forest Functional Level: Windows Server 2012 R2 Domain Functional Level: Windows Server 2012 R2 Additional Options: Global catalog: Yes DNS Server: Yes Create DNS Delegation: No'. Below this, it says 'These settings can be exported to a Windows PowerShell script to automate additional installations' with a 'View script' button. At the bottom, there are four buttons: '< Previous', 'Next >' (circled in red), 'Install', and 'Cancel'. A link 'More about installation options' is also present.

Review your selections:

Configure this server as the first Active Directory domain controller in a new forest.

The new domain name is "teste.local". This is also the name of the new forest.

The NetBIOS name of the domain: TESTE

Forest Functional Level: Windows Server 2012 R2

Domain Functional Level: Windows Server 2012 R2

Additional Options:

Global catalog: Yes

DNS Server: Yes

Create DNS Delegation: No

These settings can be exported to a Windows PowerShell script to automate additional installations
